Helmut4
Projekt Management for Adobe Video Software

Helmut4 is the solution for efficient management of editing projects in professional video production environments where Adobe Premiere Pro, Adobe After Effects and Adobe Audition are used. Helmut4 adapts to your individual workflow and serves as connecting element inside your infrastructure as well as integrator of third-party systems. Project management newly defined - agile, adaptable and user-friendly.

What are the benefits for your video production?

1. **Helmut adapts** - the logic of your workflow rather than defining the process.

2. **Helmut automates** - all routine processes, accelerating your workflow.

3. **Helmut integrates** - all types of third party systms that provide a usable API.

4. **Helmut orchestrates** - your postproduction infrastructure, serving as the crucial connecting element.

5. **Helmut simplifies** - by defining user profiles and thereby preventing errors.

Helmut4 consists of 4 components, that ease your daily work:

HelmutFX is the project manager that helps you keep track of all your projects, templates, preferences and profiles:

- Group Management
- Template Management
- User Management
- Project Management
- Metadata Management
- Language Management

HelmutIO is the render farm that lets you manage your project-related assets from ingest to export:

- Group Management
- Set priorities per render job
- Dashboard with live monitoring
- Panel Extension for Adobe Premiere Pro / After Effects
- Autoimport function

HelmutCO is the database that indexes, visualises and synchronizes with all MAM/PAM systems:

- Webbased search of assets and sequences
- Webingest
- Fully automated indexing of sequences
- Panel extension for Adobe Premiere Pro / After Effects

HelmutHK is the housekeeper that brings order to your storage infrastructure:

- Perfect archiving routines across all projects
- Webbased overview to search and manage projects
- NLE independent access to projects
- Use of the HelmutIO render nodes for an even CPU load
